Mathematical Structures

Definition 1. A definition is not a theorem.

Proposition 1. Every tree is connected.

Theorem 1. Let a solution exist.

Lemma 2.1. Let x be positive.

Corollary A.1. All solutions converge.

As shown in Theorem 99, this is only a mention.

Algorithms

Algorithm 1: Main iterative solver

Algorithm I. Repeated solver caption

Algorithm II: Second solver

Algorithm 9 is used in our experiments.

Equations

x = y + 1 (1)

z = 2*x (2a)

z = 3*x (2b)

f(x) <= 1 (A.1)

See Eq. (99) for the discussion.
